

CC Pace - Lean-Agile Capabilities Statement

OVER THIRTY YEARS, AND STILL AGILE

Committed Partner. Creating Results.

Agile Thought Leadership

CC Pace is the predominant source for a full range of Agile development, training and support services. We combine principles from Agile and Lean Six Sigma frameworks in order to improve both the quality and speed of IT projects. We typically see improvements in Time to Value in the 30-40% range — completing projects sooner with fewer defects. Whether your project support needs require custom outsource development, training, mentoring or coaching in Agile Project Management or Agile Engineering Practices, CC Pace provides the highest level of expertise.

Core Competencies

With 10 years of Agile software development expertise CC Pace provides our customers with a proven resource to deliver value to their business units quicker. We help drive programs and projects to more specific relevance to the organization's core mission; finish them on time and within budget with the lowest possible risk.

- Cut Time to Value by 30-40% (projects completed, tested and functioning)
- Risk reduction through faster deliverables to the business unit
- Customized Application Development Agile engineering tools, TDD, Continuous Integration, etc.
- Cost avoidance through Lean waste reduction principles
- Unique combination of Lean Agile framework for speed and quality

Past Performance

- Department of Housing and Urban Development
- Fannie Mae
- Freddie Mac
- Northrop Grumman
- Lockheed Martin

CC Pace Differentiators

- Recognized industry leader in Lean-Agile implementations
- Unique approach of combining process improvement with project acceleration resulting in lower cost and faster delivery
- We even train and certify our competitors!

Find Out

- How Lean-Agile helps **cut Time to Value** -- the time it takes from project inception until the **business value** of the project is actually realized.
- Why **risk reduction** is almost always an integral part of Agile delivery.
- Why there are **fewer bugs**, process errors and communication gaps.
- How Agile employs the principles in Lean to increase team efficiency and **speed the process**.
- How Lean-Agile **better aligns project priorities** and maps them to the mission and directives of the organization.
