

Capabilities Statement

A Veteran-Owned Small Business // Member of the ACIN Center (www.acincenter.org)

The Lockwood Group is a team of qualified experts in position to “Lead the Way” in the improvement of our nation’s technology base and the design of defense systems that ensure our soldiers and nation’s infrastructure are “Mission Ready.”

Our Company **Experts Leading the Way**

The Lockwood Group are experts in the management, delivery, and staffing of information technology and telecommunication infrastructure solutions. Our background focuses on developing cutting edge solutions for federal government customers. This includes building data centers for the Department of Defense and delivering telemedicine satellite solutions for hospitals within US theater networks. These solutions used the latest voice, data, and encryption technology linked via satellite or ground terrestrial radio. The Lockwood Group also possesses these value adds:

- Our founder has a well-credentialed and award winning performance history managing and delivering cost efficient and mission ready solutions for multi-million dollar Department of Defense projects.
- The Lockwood Group has expertise in delivering information technology and telecommunications solutions to DOD hospitals within US theater networks
- The Lockwood Group has experience managing multi-million dollar information technology and telecommunications infrastructure projects internationally for the federal government
- The Lockwood Group has experts who understand the comprehensive process flow of contracting with the Department of Defense.
